## TECHNICAL DATA SHEET

### **CF985 AND CF986 CORK AND CLINGFOAM CUSHION PADS**

#### *Physical Characteristics*

1/16" and 1/8" thick cork, securely laminated to a lined clingfoam which adheres to glass, steel and some plastics.

Supplied in die cut pads, according to customer specifications.

#### *General Use*

Separator Cushion Pads for Thermal Insulated Glass Panels, for glass industry, windows & doors.

With a low tack adhesive, the same products are used for the transport of Metal and Vinyl Windows. During transporting, packing, storage and installation, set between glass sheets, the pads absorb vibration.
