TECHNICAL DATA SHEET

M1207

Product Description

M1207 is a polyester film coated on two sides with an aggressive permanent pressure sensitive rubber based adhesive protected by a two-side release treated liner.

Application

This product is designed for bonding to urethane foam, closed cell sponge rubber, polyethylene foam, cork, felt, and a wide range of bonding applications when kiss cutting is required.

Typical Test Data

Thickness

Exposed side: 1.6mlls
Carrier: 0.5mlls
Liner side: 1.4mlls

Peel Adhesion

Exposed side: 104oz.
Liner side: 120oz.

Probe Tack

Exposed side: 1700 grams
Liner side: 2100 grams

SAFT

Exposed side: 170°F
Liner side: 170°F

Shelf Life

Although a specific shelf life limitation has not been established, the following guidelines are offered for consideration in extending the useful storage of supplied product up to one year.

1. Material should be kept relatively clean, and free from mechanical damage.
2. For maximum protection and extended storage material should be kept in storage not effect by weather conditions, with a temperature no greater than 72°F, and a maximum relative humidity of 50%
